

Athir Khalifa Al Abri

Computer Science/Cybersecurity and Network Infrastructure

CONTACT

Phone: +968 95177653

Email: athiralabri12@gmail.com

Address: Ibri, Al Dhahira, Oman

LinkedIn: <https://www.linkedin.com/in/athir-alabri-327ba6227/>

PROFESSIONAL SUMMARY

Motivated Cybersecurity and Network Infrastructure graduate from Sultan Qaboos University with hands-on experience in penetration testing, network security, and IT infrastructure. Strong academic background, internship experience in both public and private sectors, and a keen interest in securing systems and analyzing cyber threats.

EDUCATION

Bachelor of Science in Computer Science (Cybersecurity & Network Infrastructure)

Sultan Qaboos University | 2020 – January 2026

- GPA: 3.49
- Relevant Coursework: Penetration Testing, Network Security, Ethical Hacking, Cryptography, and Incident Response

General Education Diploma

Fatima bint Qais School, Ibri, Oman

- High School Percentage: 94%

EXPERIENCE

Cybersecurity Intern – Nama Group

June 2023 – August 2023

- Assisted in system monitoring and basic risk assessment
- Supported security practice reviews and documentation

IT Intern – Ministry of Education – Al Dhahira

June 2024 – August 2024

- Supported IT infrastructure and network systems
- Assisted in securing network environments and daily technical support

FINAL YEAR PROJECT

SmishGard – Enhancing Mobile Cybersecurity Through Smishing Detection and Awareness Using Machine Learning Techniques

- Developed a machine learning-based solution for detecting smishing attacks
- Evaluated multiple ML/DL models; selected DistilBERT for high accuracy
- Integrated explainable AI (LIME) and VirusTotal API
- Built a Flask web application for real-time detection

PROJECTS

- Bayyin – Interactive Science Learning Platform**
 - Developed a responsive web app for interactive science simulations
 - Implemented quizzes, real-time visualization, and dark mode UI
 - Integrated Supabase for backend and data handling
- Penetration testing labs using Nmap and Wireshark
- Computer forensics labs (USB imaging, RAM analysis)
- Java RMI-based distributed systems project
- Systems & network programming using C and Bash

PROFESSIONAL & TECHNICAL SKILLS

- **Programming:** Python, Java, C
 - **Cybersecurity & Networking:** Penetration Testing, Network Security, Digital Forensics
 - **Machine Learning & AI:** Machine Learning, NLP, Smishing Detection, Explainable AI (LIME)
 - **Tools & Systems:** Wireshark, Metasploit, Nmap, FTK Imager, Linux, Flask
-

ACHIEVEMENTS & AWARDS

- Sultan Qaboos University/College of Sciences' Dean's List – Fall 2024 & Spring 2025 & Fall 2025 performance
-

SOFT SKILLS

- Teamwork, Critical Thinking, Problem Solving, Communication, Time Management, Adaptability
-

CERTIFICATES

- Metasploit for Beginners: Ethical Penetration Testing (Coursera, Mar 2025)
 - Wireshark for Packet Capture: Analyze Web Traffic (Coursera, Mar 2025)
 - Web Application Security Testing with OWASP ZAP (Coursera, Apr 2025)
 - VPN Tunneling with OpenVPN: Secure Network Connections (Coursera, Dec 2024)
 - Decryption with Python (Coursera, Oct 2024)
-

LANGUAGES

- Arabic (Native)
 - English (Excellent)
-
